Habasit sets value on your food processing belts to have the right design and characteristics to keep your lines running at peak performance. Discover Food and Beverage Solutions for the Material Handling industry

Habasit - Welcome to Habasit

Many synchronous conveying applications require frequent replacement of timing belts. Habasit developed the Habasync mechanical hinge joint to make the process quick and easy. The hinge joint design is an excellent choice for both single belts or multiple belts aligned side by side.

Habasit - Belt Engineering sprockets is the "open-window" design, which promotes sanitation across the full width of the conveyor shafts. Habasit Hyclean sprockets have been developed to improve hygiene conditions and cleaning efficiency in food processing areas. This design permits 100% hinge exposure and accessibility for cleaning.

The HabasitLINK®modular belts are constructed with modules molded from thermoplastic materials connected with solid plastic rods. The all plastic design promotes long life and superior performance in many applications. In specific cases stainless steel rods can be offered, providing high belt stiffness.
