Read Book Harley Shovelhead Engine History

I can't think of any other engine in the Motor Company's history that brought multiple changes, some groundbreaking at that, during some of this great nation's most turbulent and trying times. For those of you reading this that might not know, the Shovelhead was in production from 1966 to 1984.

The History Of The Shovelhead - The Cycle Source Magazine ...

Shovelhead parts such as oil management systems were considered archaic when compared to other engines and the machine fell out of favor. Harley stopped producing the engine in 1984, although manufacturers still make custom engines in the same style. The Shovelhead was replaced by the Evolution engine that Harleys still use today.

History of the Shovelhead Engine - Streetdirectory.com

From 1966 to 1977, the Harley-Davidson Shovelhead displaced 74 cubic-inches. During production of the 1978 model year, a larger engine was offered on the FL touring bikes. Using the same base engine, displacement was increased to 1340cc (80 cubic-inches). This was achieved by boring the cylinders out to 3.50" and increasing the stroke to 4.25".
