Common Electrical Problems With Switches A wall switch gets rather warm. Dimming switches do this -it is normal for them when running 600 watts worth of bulbs (or less). Heat at a receptacle is another matter; a connection there Page 34/43

needs immediate improvement.

Common Electrical Problems of the Home To fix the problem, turn off the power to the device, then disconnect the wires and either clip off the excess wire or strip off additional Page 35/43

insulation so the proper amount of wire is exposed. Then, reconnect the wires to their screw terminal or wire nut.

6 Common Wire Connection Problems and Their Solutions Arc faults occur when an electrical

circuit veers off its intended path, often through a breach in the wiring. They are a frequent cause of electrical fires. However, arc faults are preventable through the installation of a device called an arc-fault circuit interrupter (AFCI). Page 37/43

A professional electrician can install AFCIs.

10 Signs of Flectrical Problems in Home | Home Matters | AHS One common home electrical problem involving light bulbs is that they can burn out at a high rate. Some Page 38/43

light bulbs might flicker or blink. If replacing the light bulb does not get rid of the problem, the issue might be with the light fixture itself. This could mean that there is a poor connection in your electrical circuit
