Write down the length of BM in cm. [1 mark] 1c. Write down the size of angle BMC. [1 mark] 1d. Calculate the length of BC in cm. [3 marks]

## IB Math Studies - Triangle Trigonometry Practice

This part of trigonometry can be seen in the recurring relationships between the sides of right angles triangles. The relationship means that we can use two bits of information about a triangle to work out a third and so on until we know everything we need to know.

Calculate, correct to two decimal places, the length of [AD]. 2) A gardener pegs out a rope, 19 metres long, to form a triangular flower bed as shown in the diagram below.

B

## IB Math Studies Geometry and Trigonometry Review

Right angle trigonometry When a triangle has a 90 degree angle, it's much easier – we can use Pythagoras' theorem to find side lengths and Sine, Cosine and Tangent as well. Sine rule When a triangle is NOT right angle, you can use sine rule if you know a pair of angle and it's opposite side. Cosine rule
