System x3550 M2 7946 - IBM  
IBM System x3550 (Type 7978) server is designed to deliver the highest performance per watt with four processor cores and ultradense memory, advanced application performance with new chip architecture, and optimized power management with new integrated tools. This highly manageable, ultrathin, 1 U high, rack-optimized server features ultimate application density for power managed datacenters.

SERVERS SYSTEM X3550 M2 - ServerSupply.com  
The x3550 M2 supports up to 128GB of memory (when the 8GB memory is released) in sixteen DIMM slots. Redesign in the architecture of the Xeon 5500 Series processors bring radical changes in the way memory works in these servers.

Tech Data  
Turn on the x3550 M2 server. When you are prompted with the message "Press any key to boot from cd or dvd", press any key to start the server from the Windows Server 2008 R2 Setup DVD. The files are copied from the setup DVD. This process takes a few minutes.

IBM SYSTEM X3550 M2 | eBay  
I'm trying to configure RAID in a IBM x3550 M2 server. I can't find any messages on boot about any hotkey to access the configuration utility. I wasn't able either in BIOS. The card is on a board LSI 1068e. I can't find the original CD's shipped with the server, but I downloaded Server Guide 9.21 from IBM web.
