Abstract IEC 61010-1:2010 specifies general safety requirements for the following types of electrical equipment and their accessories, wherever they are intended to be used. a) Electrical test and measurement equipment b) Electrical industrial process-control equipment c) Electrical laboratory equipment

IEC 61010-1:2010 | IEC Webstore
IEC 61010-1 is a hazard base standard covering laboratory, measurement and process control equipment. This standard includes any type of hazard which could arise during installation, operation, service and maintenance. IEC 61010-1 addresses the requirements for protection against types of hazard listed below: Electric Shock or Burn

IEC 61010-1 | Application of Standard IEC 61010-1 ...
- The requirements for testing and measuring circuits (in various subclauses and the entirety of Clause 16) have been removed and included in a particular standard IEC 61010-2-030. - Insulation requirements (6.7) have been completely rewritten. - Additional requirements for protection against mechanical HAZARDS (Clause 7) have been included.

Having a quick look at section 14 of IEC 60601-1, you will see that it's pretty much like IEC 62304. It contains sub-sections about software design, risk management, problems resolutions, and so on. But, at the same time, it references IEC 62304 for software development.

MD and IVD standards: IEC 60601-1 and IEC 61010-1, versus ...
The general standard IEC 60601-1 ... as these devices remain under the jurisdiction of the more lenient IEC 61010 series [citation needed]. Critics. The 60601 certification process has been criticized for its complexity, cost, and the business risk it raises. This has been more particularly a concern during the transition to the third edition due to the indefinite adoption schedule of the new ...

IEC 60601 - Wikipedia
IEC 61010-1 Testing EN 60601 or IEC 60601 is the European harmonized standard to meet the Medical Device Directive. EN 60601 applies to the basic safety and essential performance of medical electrical equipment and medical electrical systems.

EN 61010 & IEC 61010 Testing Lab with Product Safety Experts
IEC 62304 is more straightforward about IEC 61010-1. In Annex C, the sub-clause C.5 makes it clear about the relationship between both standards. It states that if IVD instruments contain software that can lead to a HAZARD, then IEC 62304 must be taken into account.

MD and IVD standards: IEC 60601-1 and IEC 61010-1, versus ...
- adaptation of changes introduced by Amendment 1 of IEC 61010-1:2010; - added tolerance for stability of AC voltage test equipment to Clause 6. It has the status of a group safety publication in accordance with IEC Guide 104.
