Signs Your Engine Coolant Temperature  
(ECT) Sensor Is Bad. By Mia Bevacqua.

June 29, 2018. Engine efficiency, power  
and fuel economy all improve as the  
engine temperature rises. Ideally, the  
engine will run as hot as possible without  
boiling its coolant or damaging its  
components. But a faulty engine coolant  
temperature (ECT) sensor can cause havoc  
on an engine or its related systems.

## Signs Your Engine Coolant Temperature (ECT) Sensor Is Bad

The readings produced from the coolant temperature sensor are transmitted to the engine control unit, where they are utilized as data for regulating and maintaining the proper ignition time and the optimal fuel injection through the computerized approach. It is usually placed on the right side of your vehicle adjacent to the radiator.

## Indmar Products Homepage - Indmar Products

The mechanic choked it down to a 1/8" line and ran diagnostics. While plugged into the computer, the coolant temperature was consistently 151-154 degrees. During that time the gauge was reading warm 195-210 degrees. Mechanic thinks the temp sensor is bad. Will keep you updated. Moomba engine dripless hoses CAM01742.jpg

Penta 3850397. 3/8 NPT thread size. This is the sensor that goes the guage on dash.

Amazon.com: Engine Temperature Temp Sensor Sender coolant ...

The engine coolant temperature sensor is temperature-variable resistor, which usually has a negative temperature coefficient. It is a two-wire thermistor immersed in coolant and measures its temperature. The onboard computer uses the signal of ECT as the main correction factor when calculating the ignition advance and the injection duration.

Engine Coolant Temperature Sensor (ECT)

BWD® offers top-performing and durable coolant temperature sensors that are critical to many PCM functions.

Standard® offers top-performing and durable coolant temperature that sensors are critical to many PCM functions.

Coolant Temperature Sensors | Standard  
Run the engine at 3000 RPM for an additional two minutes. The coolant level should stabilize. Shut the engine off and let it cool, preferably overnight. As the engine cools, the coolant level in the high-fill bottle will drop. With the engine cooled to room temperature, adjust the coolant level in the high-fill bottle above the MIN line.
