more than passive; he states in so many examples that color is interactive, and it can be determined and purposely activated when the group comes together to reason through what it sees.

~~Josef Albers's "Interaction of Color" Helped Me See a Way ...~~

In 1963, while at Yale, Albers wrote a book called *The Interaction of Color*, which covered in exacting detail all of his discoveries about the way colors interacted with each other. The book includes detailed lessons, experiments and graphics explaining how certain colors neutralize or alter other colors, how light affects hue, and how what he called the "normal human eye" was not able to grasp certain color phenomena due to the limitations of its perceptual capabilities.

artist, Albers worked in several disciplines, including photography, typography, murals and printmaking. He is best known for his work as an abstract painter and a theorist. His book *Interaction of Color* was published in 1963.

~~Josef Albers - Wikipedia~~

Whilst acknowledging the validity of conventional colour theory, Albers distinguishes between "Factual Facts" and "Actual Facts", i.e., between the science (physics and biology) of colour perception and the psychology of colour perception.

~~Interaction of Color: Amazon.co.uk: Albers, Josef, Weber ...~~

In his own work, Albers investigated color theory and composition. He began to explore mathematical
