Step 1: Wash the sheep eye in running water to remove the preservative fluid. Dry the eye with paper toweling. Examine the front of the eye and locate the eye-lid, cornea, sclera (white of the eye) and fatty tissue. Examine the back of the eye and find extrinsic muscle bundles, fatty tissue and the optic nerve. The four extrinsic muscles (humans have six) move the sheep eye while the fatty tissue cushions the eye.

Sheep Eye Dissection - John Burroughs School

Introduction. This sheep eye dissection will help students explore the intricacies of the eye ' s structures with a hands on experience. By having hands on experience with exploration of a sheep ' s eyeball, students will be able to gain a better understanding of
