The lectures focus on two topics: software engineering (techniques for specification, design, implementation, testing and organization) and C++ (stressing the differences between Java and C++).
Prerequisites: CS 310, CS 320L and any 400-level course. Sign-up is mandatory.

CS 410: Introduction to Software Engineering - Spring 2019
Software engineering is an engineering branch associated with development of software product using well-defined scientific principles, methods and procedures. The outcome of software engineering is an efficient and reliable

software product. Software project management has wider scope than software engineering process as it involves communication, pre and post delivery support etc.
