Study Guide. Last Updated on Wed, 23 Sep 2020 | IT Essentials. Defining a Computer. A computer is a machine composed of electronic devices used to process data. Data is the raw facts, numbers, letters, or symbols that the computer processes into meaningful information. Examples of data include a letter to a company or a client, a report for your boss, a budget proposal for a large project, or an address book of your friends and business associates.
