I just bought a John Deere 425 with the 20HP Kawasaki FD620D liquid cooled engine with 1700 hrs on it that has a stripped cam gear (I'm assuming that's what it is, its freewheeling like a car will do with a broken timing belt). I am wondering because of the high running time on this engine if I shou...

~~FD620D Rebuild Kit with steel gears | Repower Pros~~

My John Deere 425 has a Kawasaki FD620D liquid cooled V twin that ran great but used oil too. I think it's very similar to the FD750D engine. I rebuilt mine a few months ago. It had 1460 hours on it but I have no history on the tractor having just purchased it last winter. It is one of the easiest engines to rebuild that I have ever done.

How to disassemble a John Deere Kawasaki FD620D V-Twin Engine.

~~How to disassemble a John Deere Kawasaki FD620D V-Twin Engine.~~

My engine: Kawasaki FD620D-AS17 serial 128730 What I've read: "In February of 1998, steel camshafts went into all 620D engines. The following engine(s) should have the steel camshaft and stiffer valve springs. FD620D-DS02 with the beginning engine serial number of 149283..." Sounds like mine was a bit too early to get a steel one.
