Ketogenic diets alter gut microbiome in humans, mice

Ketogenic diets, which provide ? 70% of calories from fat, have been dismissed as fad weight-loss diets. However, ketogenic diets have a long history in clinical medicine and human evolution. Noting that ketogenic diets have elicited controversy, David Ludwig (New Balance Foundation Obesity Prevention Center, Boston Children's Hospital and Harvard Medical School) provides a comprehensive review, published in The Journal of Nutrition, of evidence-based studies on the effects of ketogenic ...

Ketogenic diets: What the science says

The targeted ketogenic diet is a solution to these problems. The targeted ketogenic diet (TKD) is a version of keto that still allows athletes to receive the benefits of the standard keto diet (SKD) - but with high-octane athletic performance. If you're looking to boost your performance, here's your guide to a targeted ketogenic diet.

Your Guide to a Targeted Ketogenic Diet | Ketogenic.com

The Standard Ketogenic Diet (SKD) appears to be the most researched particularly with regard to its ability to help people lose weight and control blood sugar. It typically comprises 70-75% fat, 20% protein and 5-10% carbs.

What is a keto diet? - BBC Good Food

The ketogenic diet typically reduces total carbohydrate intake to less than 50 grams a day-less than the amount found in a medium plain bagel-and can be as low as 20 grams a day. Generally, popular ketogenic resources suggest an average of 70-80% fat from total daily calories, 5-10% carbohydrate, and 10-20% protein.

Diet Review: Ketogenic Diet for Weight Loss | The ...

This diet is paleo (no grains or dairy products) and ketogenic (low carbohydrate, sugar, fruit sugar, grains and root vegetables). One can eat some carbohydrates but too much and the diet fails. The aim is to fuel the body with fat and fibre, not sugar and starch. It is not a high protein diet.
