"TO KISS EARTH GOOD-BYE is an
unusual book. It is Swann's personal
testament to his own psychic
experiences or, as he prefers, to his
experiences with the nonmaterial, but

it is also a personal evaluation of the progress of man's mind in the last two-hundred years.

In Swann's book To Kiss Earth Goodbye there is a photograph of the objects on the shelf. Swann wrote that he was aware of most of the objects on shelf above his head, but he did not know it held four numbers on a side that would not have been visible if a reflecting surface had been angled near the end.

The album's title is from a book by Ingo Swann who, with Uri Geller, carried out remote viewing experiments for the CIA in the 1970s. He claimed to have left the earth, describing ice crystals in the atmosphere of Jupiter in close-up as he roamed astrally. Teleplasmiste's cleverly layered soundscapes are deep and immersive.

Evidence from Ingo Swann and Keith
Harary Although many might disagree,
my definition of an OBE unfortunately
disqualifies some of the best evidence,
such as the many successes of the
late psychic Ingo Swann (Swann, To
Kiss Earth Goodbye, 1975, Mitchell,
Out-of-Body Experiences, 1985).
