What is lifespan development psychology? Boyd and Bee (2009) explain that psychologists who study human development have recently adopted the lifespan perspective which “maintains that important changes occur during every period of development and that these changes must be interpreted in terms of the culture and context in which they occur” (p. 4).

Definition and Explanation of Lifespan Development Psychology

According to psychosocial theory, we experience eight stages of development over our lifespan, from infancy through late adulthood. At each stage there is a conflict, or task, that we need to resolve. Successful completion of each developmental task results in a sense of competence and a healthy personality.
