Railway Archive - Locomotive Plans

Free Hot Air and Stirling Engine Plans Hot Air and Stirling Engines run using a sealed system of air where one end is heated and the other cooled, either naturally or by being immersed in a liquid. Between these ends is a displacer piston to move the air around, pushing the cooler air to the hot end and the hotter air to the cooler end.

drawings are NOT to scale and are sized only to maintain clarity of dimensions shown within a practical drawing size.

A selection of Great Western Railway locomotive drawings
During his lifetime he was responsible for the design of 166 model locomotives, many of these still being built and enjoyed to this day. Now there are literally hundreds of model engineering societies throughout the UK with thousands of active members. 5" gauge is the most popular due to the advantages it gives in terms of power, manageable weight and affordability.

5 Inch Gauge - Kingscale Live Steam

Using Computer-Aided Design (CAD) programs all kits are designed and printed in-house, with affordable prices, the model locomotive kits come complete with the necessary 3D printed parts, along with wheels, gears & motor. As well as the locomotive kits, we also offer a custom chassis building service (inside or outside frames, steam or diesel).

PDF Models – 16mm, SM32, 3D Printed, Garden Railway, 32mm ...

To find out the plans held for a locomotive you need the locomotive contract number. These have the prefix L. The numbers run L1 to L999 from 1903 until c1949 when they start again from L1. Contract numbers are recorded in the NBL engine orders book (ref: GD329/11/3).
