Final Exam Study Guide - Marine Science

Marine science is so broad that it would require a lot of space to outline every possible career path. Many of the same components that are studied on land also are studied in the water. Marine biology, marine chemistry, and marine physics are three of the disciplines that fall into the category of oceanography. Within each of these disciplines there are numerous sub-categories in which a professional is likely to specialize.

What is Marine Science? (with pictures) - wiseGEEK

Types of Marine Scientists • A marine chemist analyzes seawater and impact on marine organisms. • A marine biologist tags and tracks dolphins to study migratory patterns. • A physical oceanographer may study thermal energy conversion.
