## An Introduction to Using MATLAB

MATLAB provides some special expressions for some mathematical symbols, like pi for  $\pi$ , Inf for  $\infty$ , i (and j) for  $\sqrt{-1}$  etc. Nan stands for 'not a number'. Use of Semicolon (;) in MATLAB Semicolon (;) indicates end of statement. However, if you want to suppress and hide the MATLAB output for an expression, add a semicolon after the expression.

## MATLAB MANUAL AND INTRODUCTORY TUTORIALS

MATLAB is an interactive system whose basic data element is an array that does not require dimensioning. The software package has been commercially available since 1984 and is now considered as a standard tool at most universities and industries worldwide. It has powerful built-in routines that enable a very wide variety of computations.

MATLAB is a programming language developed by MathWorks. It started out as a matrix programming language where linear algebra programming was simple. It can be run both under interactive sessions and as a batch job. This tutorial gives you aggressively a gentle introduction of MATLAB programming language.
