MBE is very lightweight, but is rated as a 600 k engine(50% fail by then). If you downshifted early they tended to pull pretty well. I didn't like it with an Eaton Ultrashift, though. From other drivers, C-13 used plenty of oil and DPF equipped ones were very troublesome, but I have no personal experience.

MBE 4000 Section 1.9 Crankshaft Seal Wear Sleeve. ... From underneath the front of the engine, remove the bumper beam. Push the support angle bracket fairing down to create an opening in the bumper. Remove the vibration damper and pulley from the engine through the opening in the bumper.

MBE 4000 - Section 1.9 Crankshaft Seal Wear Sleeve ...

Both were 03-05 model OM460 435hp engines that lost their prime due to a pin hole leak in the fuel supply line coming out of the filter going into the pump. You have to remove the alternator and bracket to get access (Mercedes) to verify if the leak isn't that apparent.
