~~In most cases the propeller rotation will differ from the engine rotation due to the gearing. A few of the older, "Iron-Body" transmissions with specific ratios would turn either direction. But, in general, when standing at the back of the boat looking forward, with a single STD Rotation (LH/CCW) engine, most of the transmissions turned CW (opposite of the engine).~~

~~This engine was rated at 25 horsepower, but actually put out around 28. There was soon an "H" version designed for high rpm use. This version put out nearly 40 horsepower, while being rated at "25+". The Thunderbolt engine benefited from upgrades and updates, eventually becoming the Mark 40, Mark 50, and Mark 55 engines of the mid and late fifties.~~
