Interface local and click on Next button; Follow the wizard to complete the setup.

## **First Time Configuration - RouterOS - MikroTik Documentation**

System Identity is to Mikrotik what hostname is to Cisco. Configuring system identity is part of the administrative configuration and is not compulsory. This is not part of the requirement to connect a router to the internet but is recommended especially when managing multiple routers. It allows an administrator easily identify a router.

Option #1, using Winbox.  
Before you can start  
configuring CAPsMAN, you  
must configure your selected  
CAPsMAN device as a router.  
Here we will assume that  
ether1 is used as a WAN port  
and ether2-ether5 are used  
as LAN ports. You can skip  
Step1 if you are already  
using the default  
configuration on your  
router.. Step #1, setup  
router
