The same setup tool is also available in WinBox/WeBfig: Open Ip -> DHCP Server window; DHCP tab should be selected; Click on DHCP Setup button, new dialog will open, enter DHCP Server Interface local and click on Next button; Follow the wizard to complete the setup.

First Time Configuration - RouterOS - MikroTik Documentation

System Identity is to Mikrotik what hostname is to Cisco. Configuring system identity is part of the administrative configuration and is not compulsory. This is not part of the requirement to connect a router to the internet but is recommended especially when managing multiple routers. It allows an administrator easily

identify a router.

How to configure a Mikrotik router step by step

To access the Mikrotik, please change your network settings to be able to access 192.168.88.1 which is the default IP address of the Mikrotik. Once the network settings have been updated, please connect to ETH2 or port 2 to access the LAN connection. Please note that ETH1 or port 1 is for
