MCMI-IV Millon Clinical Multiaxial Inventory-IV

At 195 items, the MCMI-IV inventory is much shorter than comparable instruments. Terminology is geared to a fifth-grade reading level. The great majority of individuals can complete the MCMI-IV in 25 to 35 minutes, facilitating relatively simple and rapid administrations while minimizing patient resistance and fatigue.

The Millon Clinical Multiaxial Inventory-IV (MCMI-IV) (2015)
The Millon Clinical Multiaxial Inventory (MCMI) is used to assess a patient with a suspected or known psychological disorder to refine the diagnosis. Patients are asked a series of true/false questions which can be used to score them, looking for particular personality traits and indicators of clinical
