### Mirrors And Lenses Study Guide Answers

For a mirror, it is positive if the image appears in front of the image appears on the same side of the lens as the light source. It is negative if the image appears behind. For a lens, it is positive if the image appears on the same side of the lens as the light source. It is negative if the image appears on the same side of the lens as the light source. It is negative if the image appears on the opposite side of the lens as the light source. It is negative if the image appears on the same side of the lens as the light source. It is negative if the image appears on the opposite side of the lens as the light source. It is negative if the image appears on the opposite side of the lens as the light source. It is negative if the image appears on the opposite side of the lens as the light source. It is negative if the image appears on the opposite side of the lens as the light source. It is negative if the image appears on the opposite side of the lens as the light source. It is negative if the image appears on the opposite side of the lens as the light source. It is negative, is the case, when it is negative if the image appears on the opposite side of the lens as the light source. It is negative if the image appears on the opposite side of the lens as the light source. It is negative, is the case, when it is negative, is the case, when it is negative, is the case, when it is negative if the image appears on the opposite side of the lens as the light source. It is negative, is the case, when it is negative, is the case, when it is negative if the image appears on the lens as the light source. It is negative, is the case, when it is negative if the image appears on the lens as the light source. It is negative, is the case, when it is negative if the image appears on the lens as the light source. It is negative if the lens as the light source. It is negative if the lens as the light source is the lens as the light source. It is negative if the lens as the light source is the light source. It is negative if the light
