The SJ-400 series is equipped with the Ra calibration and step calibration methods for detector calibration (gain adjustment). In both calibration methods only the reference value described in the precision specimen needs to be entered. No other operation such as volume control is required. Saving/calling the measured data and conditions

* This is an optional accessory for the SJ-410 Series. It can only be used on the simple column stand (optional accessory, order No. 178-039). When the units are used in combination, straightness for SJ-411/412 drive unit will be degraded about 0.2 μ m. Cannot be used when the tester's main unit is an older model (SJ-401/402). Auto-set
