Describe how water, as a solvent, buffers the structure of ions in solution. Describe properties of water that make it the most suitable to support living systems. Describe the difference between covalent and non-covalent bonds. Describe the energy associated with breaking covalent and non-covalent bonds.

Modern Biology — Open & Free – OLI

Although modern biology is a relatively recent development, sciences related to and included within it have been studied since ancient times. Natural philosophy was studied as early as the ancient civilizations of Mesopotamia, Egypt, the Indian subcontinent, and China. However, the origins of modern biology and its approach to the study of nature are most often traced back to ancient Greece.
