How to Wet Sand and Buff New Paint - Single Stage or BC/CC

Single stage urethanes can definitely be wet-sanded, and you actually can wet-sand a base coat before shooting the clear--a lot of people don't know that you can do that." Urethane paints do contain isocyanates, toxic compounds that are

Industries give you a great finish on your restoration project. They allow you to achieve color and gloss with a single product. With a 3:1 mix ratio (3 parts paint to 1 part activator), these paints are easy to mix and easy to apply. Although not required, clear coat can be applied to provide a deeper finish and additional protection.
