NANO INTERNAL COMBUSTION ENGINES ABSTRACT NANO... Nanotechnology in mechanical field is the internal combustion engine on a nano scale, which we have chosen as our area of interest. Heat engines have evolved from external combustion engines to internal combustion engines and the hot off the block is the nano internal combustion engine. This picture gives an idea of the size of the nano internal ...

Cerium oxide nanoparticles can also be used as a short-term treatment for particulate filters in diesel engines. These nanoparticles help to clear away soot, which clogs up the filters, in an effort to drastically improve the performance of the filters and the overall cleanliness of the exhaust emissions.
