Nervous System Study Guide

Flashcards | Quizlet

Three cavities, called the primary brain vesicles, form during the early embryonic development of the brain.

These are the forebrain (prosencephalon), the midbrain

The Nervous System - Science
Olympiad

The nervous system is a network of neurons whose main feature is to generate, modulate and transmit information between all the different parts of the human body. This property

Where To Download Nervous System Study

enables many important functions of the nervous system, such as regulation of vital body functions (heartbeat, breathing, digestion), sensation and body movements. Ultimately, the nervous system structures preside over everything that makes us human; our consciousness,
