Oracle® Master Scheduling/MRP and Oracle Supply Chain Planning managing the production schedule; You use the schedules generated by master scheduling as input to other manufacturing functions, such as material requirements planning and rough-cut capacity planning. Master Demand Schedule (MDS) The MDS is a statement of demand and contains details of the anticipated shipment schedule. You can consolidate all sources of demand into a master demand schedule to represent a statement of total anticipated shipments.

User Guide Oracle Master Scheduling Mrp | calendar.pridesource

Oracle Master Scheduling/MRP and Supply Chain Planning always generates a reschedule in message if an order is scheduled to arrive later than it is required. Although the planning process may suggest rescheduling some scheduled receipts and may not suggest rescheduling others because of the acceptable early days limit, it does not violate the order of the current scheduled receipts.

---

Overview of Plan Control | OracleUG

Oracle Master Scheduling/MRP and Supply Chain Planning automatically consumes forecasts for product families, configurations, models, option classes, and options when you place sales order demand for configurations. By default, forecast consumption consumes forecasts by item.
