Perkins Marine Engines for sale UK, used Perkins Marine ...
Marine engines are calibrated for a specific type of workload that moves boats at velocities compatible with aquatic vessels and marine law. These engines are also stored where their weight can be managed and where crew members can easily work on them. The size of the boat will dictate how much power it needs and how much weight it can carry. Perkins engines are adaptable to wet conditions also. Diesel will continue working without being flooded by the presence of water.

The common rail fuel system in a diesel engine is made up of a high-pressure fuel rail feeding a set of injectors powered by a fuel injection pump. Older engines use unit injection systems of rotary or inline pumps. Perkins fuel systems are carefully designed and tested to deliver the required power and the best fuel consumption.
