Physics Notes (Form 5..Chapter 1)
LESSON 1. Understanding Waves
Motion. By the end of this lesson, you
should be able to: • Describe what is
meant by wave motion, • Recognise
that waves transfer energy without
transferring matter. • Compare
transverse and longitudinal waves and
give an example of each.

Physics Form 5: Chapter 1 -

Diffraction Diffraction is the spreading of a wave as it goes through a narrow gap or passes round a small obstacle.

The effect of diffraction increases when the width of the gap is decreased. The effect of diffraction increases when the wavelength is increased.
