In poultry feeding guide, chicken diet is formulated around the energy requirement of the chicken. There are two species of poultry birds; The meat type and the egg type. The meat type is the broiler chicken while the egg type is the laying chicken. The nutrient requirements of these chickens are not the same.

Chicken Feeding Guide: For Broilers And Layers

A good rule of thumb is to provide 3-31/2 square feet of floor space for each bird you intend to keep for egg production. If you buy straight-run chicks (a mixture of males and females), allow space for about half the number of chickens you start with.

Management Guide for the Backyard Flock | The Poultry Site

Poultry Layer Management. Farmers categorize their poultry birds into several stages like brooding, growing, pullet and layering. Layering starts when the birds are 20 weeks of age. Once the birds can reach the egg-laying age they are given layer feed and they are transferred to the egg-laying quarters at the age of 18 weeks. Unproductive, sick birds should be removed from the flock.
