Practice of  
Intramedullary  
Locked Nails - K S  
Leung, G ...

According to the text,  
intramedullary nails  
acts as stress-  
shielding instruments  
when locked  
statically; and acts as  
a stress-sharing  
instrument when it is  
not locked. Unlocked  
nails also act as an

## Where To Download

internal splint while the fracture heals. When the nail is stress shielding, fracture healing is primary (with no callus), unless the nail is not well fixed, in which case fracture healing is secondary. When the nail is stress shearing, fracture healing is secondary (with
