Prc 150 Operators

The AN/PRC-150(C) Computer Telephony Interface (CTI) autoreject option is used in radios deployed in a CTI capable 3G network. This feature enables the operator to have the AN/PRC-150(C) automatically reject any incoming CTI call. The radio will still respond to 3G calls and the operator will be able to place an outgoing CTI call.

AN/PRC-150 - Wikipedia

The AN/PRC-150(C) can connect to a standard PLGR GPS device. The accurate GPS timing data can be used for ECCM and advanced ALE synchronization. Integrated telephony capability allows the radio operator to place and receive telephone calls using the radio keypad when used with the RF-6010 Tactical Network Access Hub.

AN/PRC-150 (C)

Do not operate the AN/PRC-150 on unauthorized frequencies. The AN/PRC-150 frequency band coverage does not constitute authorization for indiscriminate use of any frequency. • Turning the Antenna Adapter Body or VHF Blade Antenna can damage the Radio Frequency Antenna connector on the radio and damage the antenna itself. • The AN/PRC-150 ...

L3Harris leveraged 50 years of engineering expertise to deliver new generation HF capabilities in the AN/PRC-160(V). The manpack's data speeds are up to 10 times greater than any existing HF radio, giving warfighters the power to share higher-speed communications and more sophisticated ISR through long-haul connectivity.

AN/PRC-160 (V) Wideband HF/VHF Manpack Radio | L3Harris ...

The AN/PRC-150 I radio, refer to Figure 3-1, provides units with state of the art HF radio capabilities in support of fast moving, wide area operations. HF signals travel longer distances over the ground than the VHF (SINCGARS) or UHF (EPLRS) signals do because they are less affected by factors such as terrain or vegetation.
