Relationships and Biodiversity biodiversity  
– a measure of the number and types of organisms in a location • helps maintain ecosystem stability • useful to humans for food, medicine, clothing, shelter, oxygen, soil fertility, future genetic variation, enjoyment • we have no right to destroy

New York State Required Labs – Review Diffusion Through A ...

This lab has 7 tests used to determine the relatedness of 4 plant samples. Remember that scientists use a variety of evidence to determine evolutionary relationships, including cell types, structural morphology, DNA, behavior, embryology, and fossils. The more criteria that are shared between organisms, the more likely they are closely related.
