You will need to temporarily define a coordinate representing the rotation of the disk ... Note that you do NOT need an FBD of B since you already know its motion. Here you need to relate  $x_{\ddot{}}$  to ...

## ~~Homework H6.C.19~~

Although the motion of B is made up of simple components (constant rotation rate for link OA, constant rotation rate for AB and constant extension of the telescoping link), the motion of B is quite ...

## ~~Homework H3.A.11~~

To a good approximation, the planets and sun exert zero rotational (as ... earth's "moment of inertia", a concept like mass but related to rotations rather than linear motion.

~~What force makes the earth rotate on its own axis? Could its rotation ever slow down?~~
