The Samsung Refrigerator temperature display blinks when the refrigerator has an ultra-high temperature (above 59 degrees Fahrenheit) that needs to cool down. The reason the internal temperature of your fridge rises could be because one of the doors has been left open for too long or the refrigerator is recovering from a power outage.

Samsung refrigerator cooling issues If your freezer, fridge, or other temperature controlled compartments (such as FlexZone) are not cooling, there are several things you can do. Most cooling concerns can be resolved by adjusting refrigerator settings, proper use and care, inspecting and cleaning the door seals, or resetting the refrigerator.

~~Samsung refrigerator cooling issues~~  
If your Samsung fridge problems include a fridge leaking water, a few troubleshooting tips can help identify the problem before the water damages your floor. If the defrost drain is frozen, thaw the ice so the water can run freely again. Otherwise, water can spill over the drain trough and eventually find its way onto your floor.
