Configure SAP EWM Specific Parameters in SAP Hana - SAP ...

SAP EWM is a part of SAP Supply Chain Management like Warehouse management system but provides more robust and advanced features to manage

key activities in the Warehouse. SAP Extended Warehouse Management is similar to Warehouse management but it provides more features like picking, put away, RF framework, Warehouse structure and more

flexible options to manage the warehouse functions.

SAP Extended Warehouse Management: Processes ...

Steps involved in the Split valuation configuration are

• Define valuation type – it is to be maintained in the material master accounting

view • Define Valuation category – contains the possible valuation classes assigned to it and also mapped with valuation type. • Define the split valuation to the individual plants.
