will it function, and other characteristics, etc. A business analyst prepares the product or solution scope. The purpose of the solution scope is to conceptualize the recommended solution in enough detail to enable stakeholders to understand which new business capabilities an IT business solution will deliver.

~~Solution Scope vs. Project Scope - Enfocus Solutions Inc~~

The "Solution Scope" is purely related to "What" is included in the solution (functional & non-functional features, other characteristics etc) and is not focussed on "How" the solution is delivered. It refers to set of capabilities a solution must deliver in order to meet the business need.

~~Defining the Scope of Your Solution — SAP Help Portal~~

Defining Project, Product and Solution Scope. Sep 5, 2010. sweeseltre. Defining product and project scope is an important framework for detailed requirements development. In order to define the scope of the project's end result (the product or solution) and the project's implementation needs (the project itself), it is critical to understand the difference between product and project scope and which one should be addressed first in the requirements development process.

~~» Defining Project, Product and Solution Scope~~

- Solution/Product scope statements are the features and capabilities of the solution/product that live on after go-live; they are not the tasks that need to be done to deliver the solution. - Project scope alone (task driven) is dangerous to the project success as there is no common alignment and documentation on what should live on once it is implemented.

~~Project and Solution Scope — The Importance of Both | BA ...~~

A scope statement, whether it is a product or project scope statement is very important in any project proposal or any research statement. This is because scope statement details the goals and objectives and the possible output that leads to a successful project. Every project manager should keep in mind the qualities of an effective scope statement.

~~7+ Scope Statement Examples & Samples in PDF~~

Without a scope, your project has a high likelihood of failure. If you don't define the limitations of the project, you won't be able to expect the risks and issues which will come up. When that happens, then the project participants will have no idea what to do when these issues arise, and so your
