Ch. 20.2 Diversity of Fungus Flashcards | Quizlet

Diversity of Fungi : What Are the Main Characteristics of Fungi? Fungi are the first group of multicellular organisms that we will study. Fungi arose from a protist ancestor and are classified in the Supergroup Opisthokonta. Contemporary fungi are a widespread and ecologically important group of organisms.

Diversity of Fungi

Fungi contain unicellular, multinucleate, and multicellular forms.They are classified on the basis of their reproductive spores and the nature of their multinucleate or multicellular filaments known as hyphae. The structure of Penicillium is shown in Figure 2. Fungal cells have cell walls containing the carbohydrate chitin. Chitin also occurs in the exoskeletons of the animal phylum arthropoda.
