Ship Engine Room Machinery And

A junior engineer should know thoroughly about the placement of various machines even before going on board and this is taught during pre-sea training and other academic courses. Here is an aid to gain more of this knowledge and the next few articles will provide a bird's eye view of the various platforms which form a central part of the machinery arrangement in a ship's engine room

Ships Engine Rooms - Ships Main Engines & Central ...

On a ship, the engine room is the compartment where the machinery for marine propulsion is located. To increase a vessel's safety and chances of surviving damage, the machinery necessary for the ship's operation may be segregated into various spaces. The engine room is generally the largest physical compartment of the machinery space. It houses the vessel's prime mover, usually some variations of a heat engine. On some ships, there may be more than one engine room, such as forward and aft, or po

Engine Room - | Ship Machinery | Used Recondition

Auxiliary Marine Machinery. Marine machinery is designed to ensure the proper functioning of a ship's main engines, piping systems, and equipment. Auxiliary marine machinery includes pumps, compressors, and blowers for circulating fuel and the fresh water and seawater used in cooling systems, for supplying air to the starting system of the main engine, for cooling refrigerated holds, and for air-conditioning various parts of the ship and for refrigeration machinery.

Auxiliary Marine Machinery - University of Rijeka

The engine room is generally the largest physical compartment of the machinery space. It houses the vessel's prime mover, usually some variations of a heat engine - diesel engine, gas or steam turbine, or some combination of these (such as CODAG; see Marine propulsion). On some ships, the machinery space may comprise more than one engine room, such as forward and aft, or port or starboard engine rooms, or may be simply numbered.

Engine room - WikiMili, The Free Encyclopedia

The ship's engine room layout has to be studied by every marine engineer in order to get the basic knowledge of all the machinery provided in the ship's engine room. Ship engine room design differs from ship to ship, but still, almost all the machinery is the same and also placed at a similar location in the marine engine room.
