The new and used single- and twin-engine turboprop aircraft you ' ll find for sale on Controller.com costing anywhere from less than \$600,000 to \$4 million or more offer a wide range of features and performance.

Turboprop Aircraft For Sale - 766 Listings | Controller.com

If you want a jet aircraft, a turboprop has advantages over regular jet aircraft, particularly in its cost to use and ability to land on shorter runways. They can also carry more passengers than most turbine airplanes. We have single and twin engine turboprops for sale from manufacturers such as Beechcraft, Cessna, and Dornier. With our directory you can contact the seller directly to learn more about their used aircraft.

Turboprop Aircraft for Sale | AircraftForSale.com

For the similarly named World War II-era aircraft, see North American T-6 Texan. The Beechcraft T-6 Texan II is a single-engine turboprop aircraft built by the Raytheon Aircraft Company (which became Hawker Beechcraft and later Beechcraft Defense Company, and was bought by Textron Aviation in 2014).

The SOCATA TBM (now Daher TBM) is a family of high performance single-engine turboprop business and utility light aircraft manufactured by Daher. It was originally collaboratively developed between the American Mooney Airplane Company and French light aircraft manufacturer SOCATA.. The design of the TBM family originates from the Mooney 301, a comparatively low-powered and smaller prototype ...

SOCATA TBM - Wikipedia

Used turboprop aircraft like the Cessna Caravan 208 are popular with those looking for rugged and reliable transportation into and out of areas that are not as hospitable as a perfectly maintained airport with pristine tarmac. A Cessna 208 is an example of a turboprop aircraft that frequents the Alaskan bush as well as the open water. Frequently seen outfitted with amphibious floats, the Cessna 208 takes advantage of one of the turboprops aircraft's greatest strengths; the significant low ...

Turboprop Aircraft for sale - New & Used

Turboprops are ideal for owners and operators flying shorter trips and needing to access more remote airports with unpaved runways. Buyers shopping for a new business turboprop aircraft can expect to pay between \$1.8m for a small single-engine model up to around \$6.5m for a large twin-engine turboprop. Popular models available today are built by Beechcraft, Cessna, Daher, Piaggio, Pilatus and Piper.

Turboprops for Sale | AvBuyer

Socata ' s single-engine, single-pilot certified TBM 900 is the newest aircraft on this list, introduced in 2014 as an upgrade to the TBM 850. It burns 70 gallons of fuel per hour, which, at \$5 per gallon, is \$350.00 per hour. Maintenance on the TBM 900 is estimated to
