The art of adjusting a small engine carburetor comes from training and experience. A small engine technician adjusts more by feel and sound than by manufacturer's specs and this is something that comes only from experience. That being said, I will provide you with some very basic, "rule of thumb" techniques.

If the engine is emitting black smoke, this could mean that the air filter is dirty, the fuel could have gone bad, and/or the carburetor is flooded. Start by checking your air filter, if it looks okay, move onto replacing the gas. If the problem continues, refer to the following for cleaning/replacing your Carburetor.
