**Special Senses Anatomy and Physiology - Nurseslabs**

The special senses are the senses that have specialized organs devoted to them. Special senses include the following: Hearing (the ear) Sight/Vision (the eye) Smell (the nose) Taste (the tongue) The special senses have specialized sensory receptors or nerve endings. These nerve endings are present in the ears, eyes, nose and mouth.

**Special Senses - Anatomy & Physiology**

Smell (Olfaction) The other special sense responsive to chemical stimuli is the sense of the smell, or olfaction. The olfactory receptor neurons are incorporated into a limited region of the nasal epithelium in the superior nasal cavity. Anatomy of the Structures Involved in Smell (Olfaction). The olfactory bulb (1) contains mitral cells (2) that receive information from the olfactory cells (6).
