#### *Server Reporting Services*

#### *Administrator*

SQL Server Reporting Services is a server-based reporting platform that provides a full range of ready-to-use tools and services to help you create, deploy, and manage reports for your organization, as well as programming features that enable you to extend and customize your reporting functionality. You can integrate your reporting environment with a SharePoint product to experience the benefits of using the collaborative environment provided by SharePoint sites.

## SQL Report Server Permissions

Within the SSRS website, the first item to setup is to create system level permissions; these permissions are assigned to the main administrators of SSRS and the "power" users who publish reports. Similar to SSAS, SSRS uses a role concept. Two main roles, System Administrator and System User are predefined.
