This new staple would be a strong, rapidly deployable closure device that does not require a second procedure to remove ... look at varying alloy additions in steels and induction hardening as this ...

Senior Design Projects 2012-13

Offered second half of semester, to be taken concurrently with ... Applications of these concepts (e.g., heat treatment of steel, casting, powder processing, etc.) are presented to provide a bridge ...

Materials Science and Engineering Flow Chart

The second breakout results when wire falls into the gap near ... This solid solution is exposed to a long heat-treating process of 2–6 hours. This process drives these alloying elements from the ...

Microwire Use in Catheter-Based Medical Device Applications, Part 1

In the second example ... To deal effectively with shrinkage, it is necessary to heat the extruded tubing beyond its glass transition temperature, or T_g, for a few hours. This treatment can eliminate ...

Critical Factors in Extruding Catheter Tubing from Polyamide

All it takes is a second for a situation to go very bad ... Make sure nothing can conceivably cause fuel to be exposed to heat in the presence of oxygen — the basic recipe for fire.
