Walking Beam Stirling Engine

Walking Beam Stirling Engine: I recently decided to build a walking beam engine. I was going to make it out of wood and tin cans, I wasn't sure how it would all fit together so I made a cardboard mock up. The cardboard mock up was pretty strong, so I thought, why not just try an I

The walking beam engine similar to yours was one of the most powerful Stirlings I built. I had a Lathe at the time making the construction a piece of cake. A highly pressurized (2000psi) Stirling using helium as a fluid, made from a non-heat transfer material called Unobtainium powered by reflected sunlight sounds great....but like the original Stirlings....They must be huge.
