That headline is how the National Federation of Independent Business describes the number of unfilled positions at the small firms in its monthly employment survey, due out later today. The ...

Job Openings Still in the 'Stratosphere'

When space debris reenters the atmosphere, the heat generated from friction causes most of it to vaporize. Recently, scientists have found that the vaporized metals condense as they descend ...

Metals from space debris found in stratosphere

Atmospheric scientists recently found traces of unexpected metals in the stratosphere, the second-lowest layer of the atmosphere where ozone resides and meteors burn up into shooting stars.

Rockets and satellites are shedding metal into the atmosphere

Now scientists have found another pollutant to worry about: vaporized metals from burned-up space junk that are floating around in Earth's stratosphere, the same atmospheric region that holds ...

### Space Junk Is Polluting Earth's Stratosphere with Vaporized Metal

It is virtually impossible to be anywhere in Las Vegas and miss the Stratosphere. It towers 1,149 feet above Las Vegas and is the tallest observation tower in the United States. The casino itself ...
