Structural Engineering and Structural Mechanics (SESM) is a graduate program within the Department of Civil, Environmental and Architectural Engineering. We teach and perform research on mechanics of solids, mechanics of structures, and structural engineering. Our research spans multiple dimensions. At the micro level we seek to improve our understanding of materials through experiments and numerical simulation.

STRUCTURAL ENGINEERING AND STRUCTURAL MECHANICS (SESM)

CEE's Structural Engineering, Mechanics, and Materials (SEMM) Program has an international reputation for excellence. Many of the fundamental developments underlying the state-of-the-art in structural engineering, mechanics, and materials were pioneered by SEMM faculty and students. This tradition of excellence continues today through vigorous programs of basic and applied research, and careful attention to instruction.

At UC Davis, the Structural Engineering and Structural Mechanics (SESM) Group is actively engaged in both computational and experimental approaches to address issues in structural and solid mechanics. Ongoing research in the SESM group addresses structural and non-structural materials and systems, and encompasses virtually all relevant size-scales including micro-structural, structural component, and structural system levels.
